PROFESSIONAL SUMMARY

Full-stack software engineer with 2+ years building production web and mobile applications in React, TypeScript, Node.js, and Flutter. Strong record of shipping features end-to-end, resolving production incidents, and optimizing backend performance, backed by a mathematics and computer science background from the University of the Philippines.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Dart, C, C++, C#, Go, SQL, Bash

Frontend: React, Next.js, React Native, Flutter, HTML, CSS, Tailwind CSS, Redux, TanStack Query, Riverpod

Backend: Node.js, Express.js, Spring Boot, ASP.NET Core MVC, REST APIs, Prisma, Drizzle, Drift

Databases and Cloud: PostgreSQL, MySQL, MongoDB, SQLite, Redis, Elasticsearch, PostGIS, AWS, Docker, Kubernetes, Supabase

Tools and Practices: Git, GitHub Actions, CI/CD, Postman, Jira, Figma, Mapbox, Vitest, Agile, Scrum, Code Review

AI and Automation: Claude, Claude Code, Codex, Cursor, Gemini CLI, Groq API, OpenAI API, n8n, Prompt Engineering

PROFESSIONAL EXPERIENCE

Freelance Software Engineer, Upwork

Jan 2025 - Present

Remote

- Resolved 12+ production-blocking bugs with average turnaround under 24 hours, restoring client workflows quickly.
- Rebuilt internal release automation, eliminating 15+ manual steps and reclaiming approximately 4 engineering hours per week.
- Shipped 3 client-facing features end-to-end across React, TypeScript, and Node.js stacks, scoping requirements directly with non-technical stakeholders and authoring REST API documentation that cut new contributor onboarding from 1 week to 2 days.

Software Monitoring Engineer, Wind's Gate Philippines

Jun 2025 - Jan 2026

Cebu City, Philippines

- Caught and escalated 25+ incidents across 8 production services before reaching end users, owning live uptime visibility for the team.
- Traced incidents from raw logs to root cause, redesigned the team's incident report format (cutting average triage time by 30 percent), and authored 8+ recovery runbooks that let on-call engineers resolve Tier 1 issues without escalation.

Software Engineer Intern, Alliance Software Inc.

Jun 2025 - Jul 2025

Cebu City, Philippines

- Delivered 5 production features into live client codebases using C# and ASP.NET Core MVC, serving thousands of daily users at one of the largest software firms in the Philippines.
- Participated in code reviews, pair programming, and agile ceremonies with senior engineers.

Full-Stack Developer Intern, Bayoa Analytics

Sep 2024 - Nov 2024

Remote

- Diagnosed N+1 query patterns and schema bottlenecks, reducing API response time from 800ms to 150ms on high-traffic endpoints.
- Built 10+ REST API endpoints in Node.js and Express.js and developed reusable React components in TypeScript and Tailwind CSS, accelerating feature delivery for downstream teams.

PROJECTS

FireCheck, GIS and Field Survey Mobile Application

github.com/jlescarlan11/firecheck

Technologies: Flutter, Dart, Riverpod, Drift, Mapbox SDK, Supabase, WorkManager

- Sole developer; shipped MVP across 7 release phases. Engineered an offline-first outbox sync engine with two-phase photo upload, WorkManager retry/backoff, and 409 bundle-export fallback, replacing 2 legacy paper-and-tablet workflows.

HEALTH, AI-Assisted Triage and Offline Care Guide

github.com/jlescarlan11/health

Technologies: React Native, Node.js, Express.js, Prisma, PostgreSQL, SQLite

- Led 5-person team to Semi-Finalist (top 15 of 200+ teams) at the 1st Naga City Mayoral Hackathon. Built civic health app that safety-gates AI triage through deterministic logic, with 100% of core features usable offline via SQLite persistence.

PriceCraft, Live Profit Pricing Calculator

github.com/jlescarlan11/pricecraft

Technologies: React, TypeScript, Supabase, Vitest

- Built pricing calculator for small-business operators with markup and profit-margin strategies. Engineered an edge-case-hardened calculation engine (zero-cost, negative margins, rounding) so non-technical users get correct prices on the first try.

EDUCATION

Bachelor of Science in Computer Science

Aug 2025 - Present

University of the Philippines Cebu

Honors: University Scholar. *Achievement:* Semi-Finalist, 1st Naga City Mayoral Hackathon (top 15 of 200+ teams).

Bachelor of Science in Mathematics

Sep 2022 - Jun 2025

University of the Philippines Cebu

Honors: College Scholar. *Scholarship:* DOST Junior Level Science Scholarship (JLSS) Awardee.

CERTIFICATIONS

Amazon Junior Software Developer with Generative AI - Coursera, Oct 2025 - coursera.org/account/accomplishments/specialization/PLMC59Z3

Agile Project Management - Google via Coursera, Sep 2025 - coursera.org/account/accomplishments/verify/QYUV5C56WQCV
