PROFESSIONAL SUMMARY

Software developer experienced in building and maintaining production web applications using TypeScript, React, Next.js, Node.js, PostgreSQL, and Supabase. Shipped full-stack features, resolved production incidents, improved API performance and release workflows, and built marketplace, payment, and automation systems for remote teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Python, C#, Java, Dart

Frontend: React, Next.js, Tailwind CSS, Redux, TanStack Query, Flutter, HTML, CSS

Backend: Node.js, Express.js, ASP.NET Core MVC, REST APIs, Prisma, Drizzle

Databases and Cloud: PostgreSQL, Supabase, MySQL, MongoDB, Redis, AWS, Docker

Testing, Delivery, and Integrations: Vitest, Git, GitHub Actions, CI/CD, Postman, n8n, Mapbox, PayMongo, OpenAI API, Groq API

PROFESSIONAL EXPERIENCE

Software Monitoring Engineer, Wind's Gate Philippines

Jun 2025 – Present

Cebu City

- Identified and escalated 25+ incidents across eight production services before they reached end users.
- Authored eight recovery runbooks that enabled engineers to resolve Tier 1 issues without escalation and reduced average triage time by 30%.

Freelance Software Engineer, Upwork

Jan 2025 – Present

Remote

- Resolved 12+ production-blocking defects with an average turnaround of less than 24 hours, restoring affected client workflows.
- Rebuilt release automation to remove 15+ manual steps and save approximately four engineering hours per week.
- Delivered three client-facing features using React, TypeScript, and Node.js and wrote REST API documentation that reduced contributor onboarding from one week to two days.

Software Engineer, Pharmacy & Acute Care University

Feb 2026 – Aug 2026

Contract, Remote

- Build and maintain full-stack features for an online learning platform, including administrative workflows, personalized study programs, eBook and reader access, review reminders, and subscription-based access.
- Diagnose production issues across React and TypeScript interfaces, Node.js APIs, PostgreSQL schemas and migrations, content assets, and entitlement rules, restoring blocked learner and administrator workflows.
- Contribute to technical design, code review, automated testing, rollout planning, and reliability improvements across frontend and backend systems.

SELECTED PROJECTS

Rent N Roll, Camera Rental Marketplace

rentnroll.store

Technologies: Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Zod, PayMongo

- Built a two-sided camera rental marketplace with listing and photo management, booking and availability workflows, identity verification, digital contracts, handoff confirmations, and payment and deposit handling through PayMongo webhooks.
- Refactored the data layer to replace 24 untyped database queries with typed Supabase RPC patterns and generated types, improving consistency and maintainability.

Job Pipeline, Automated Job Application Workflow

github.com/jlescarlan11/Job-Pipeline

Technologies: n8n, Groq API, Google Sheets API, JavaScript

- Built a three-workflow automation system that collects job listings, generates tailored application messages through the Groq API, and archives processed results in Google Sheets.
- Added cross-sheet deduplication, prompt validation, URL and project whitelists, generation limits, and rate-limit-aware batching to prevent repeated processing and unsupported output.

EDUCATION

Bachelor of Science in Computer Science

Aug 2025 – Present

University of the Philippines Cebu

Honor: University Scholar. *Scholarship:* DOST Junior Level Science Scholarship Awardee. *Achievement:* Semi-Finalist, 1st Naga City Mayoral Hackathon (top 15 of 200+ teams).

Previous Program: Bachelor of Science in Mathematics

Sep 2022 – Jun 2025

University of the Philippines Cebu

Honor: College Scholar. *Certification:* Amazon Junior Software Developer with Generative AI, Coursera, Oct 2025.
